

Cybersecurity Risk Services

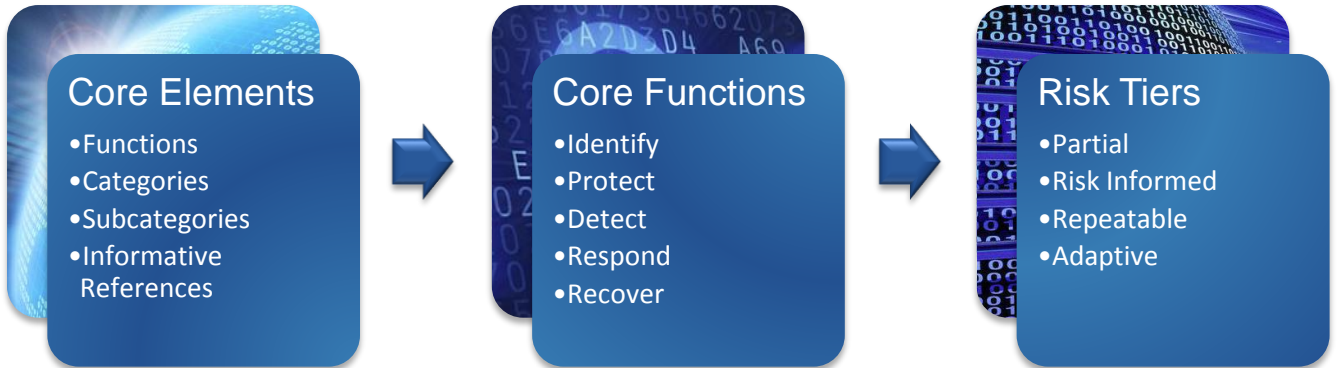

Executive Order 13636: Cybersecurity Framework

THE NORMAN GROUP MANAGEMENT CONSULTING offers unique expertise to each client for each engagement. Nowhere is that more important than in cybersecurity.

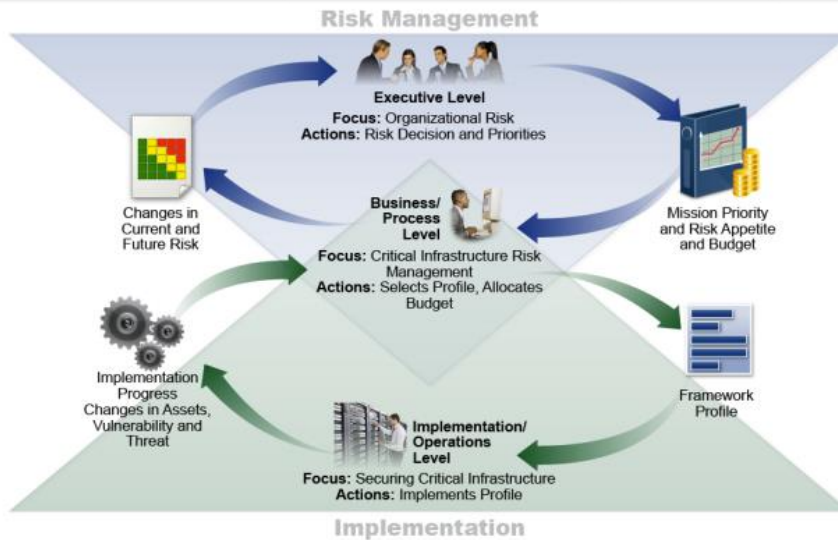

Currently rated as the most concerning risk organizations face, cybersecurity consulting services must be 100% on target in terms of both priority and impact – in addition to being on time and on budget.

All participants are at risk in this high stakes threat. Stakeholders expectations are high; internally and externally. Much more than reputation is at risk requiring the best investment and planning possible.

NIST (National Institute of Standards and Technology) Cybersecurity Framework
